EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Replace the Title with: Method for Manufacturing a Soy Protein Product

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance:

The prior art does not disclose or teach the particular method of preparing a protein product by (a) providing a substantially defatted soybean material; (b) treating said material with an enzyme at an effective temperature and pH for an effective time to achieve a combined monosaccharide and sucrose content of at least 10% of total dry matter in said product and a combined raffinose and stachyose content of less than 5% of total dry matter in said product; (c) removing fiber from said material before or after said treatment to achieve at least 60% protein of total dry matter in said product; and (d) inactivating said enzyme after said treatment. The prior art of record, in particular, Crank et al (U.S. Patent No. 5858449) discloses a different process for producing a protein product which does not include the addition of an enzyme to achieve the particular sugar contents called for. Crank et al actually teaches away from the instant invention in that not only is an enzyme not added, but enzymes that are

naturally found in the soybean are denatured/inactivated at the beginning of treatment of the defatted soybean material.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
